

8 Thousand Feet	-1c
7 Thousand Feet	1c
6 Thousand Feet	3c
5 Thousand Feet	5c
4 Thousand Feet	7c
3 Thousand Feet	9c
2 Thousand Feet	11c
1 Thousand Feet	13c

Standard Temperature at sea level is 15c

Example WX: 16c For a cruising altitude of 4,500
 So at 4,500 you are **10c degrees over standard**

16c @4,500 But standard would be 6c That's 10c higher than standard

Press Alt ft	RPM	20° C Below Standard Temp			Standard Temperature			10° C Above Standard Temp
